4 domains of developmental milestones :

- Gross motor
- Fine motor
- Language
- Social

Gross motor and Fine milestones

00:02:47

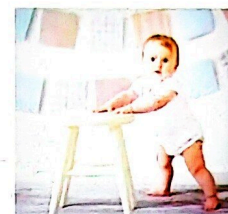

Gross Motor

Rule : Direction of development → **Cephalo-caudal**.

Age	milestone attained
3 months	Head control/Neck holding
4-6 months	Rolls over(trunk control+)
6 months	Sits with support : Tripod posture
8 months	Sits without support, crawling
10 months	Stands with support, creeping
11 months	Cruising
12 months	Stands without support, walks with support
15 months	walks without support (independently)
18 months	Runs
2 years	Climbs with 2 feet/step holding side rails
3 years	Climbs upstairs with 1 foot/step, rides tricycle
4 years	Climbs downstairs with 1 foot/step, hops

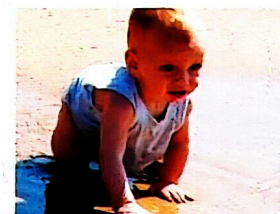

Tripod position : 6 months

Cruising : 11 months

Crawling : 8 months

Creeping : 10 months

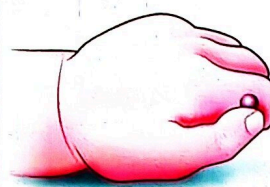

Hopping : 4 years

khanirfan0392@gmail.com

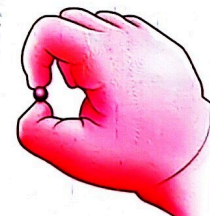

Fine motor

Grasping

Age	milestone attained
0-3 months	No fine motor milestone (Neonatal palmar grasp reflex + → closed hands).
4 months	Bidextrous grasp (Reaches for objects with both hands.)
6 months	- Unidextrous grasp : ulnar (immature) palmar grasp Transfer objects from one hand to another.
8 months	unidextrous grasp : mature (Radial) palmar grasp
9 months	Immature pincer grasp (Hold with sides of fingers)
12 months	mature pincer grasp (Holds with tip of fingers)
18 months	Scribbles

Immature pincer grasp : 9 months

mature pincer grasp : 12 months

----- Active space -----

Tower of cubes

Age	milestone attained
15 months	makes a tower of 2 cubes
18 months	makes tower of 3 cubes
2 years	makes tower of 6 cubes
3 years	makes tower of 9 cubes.

Dressing & Undressing

Age	milestone attained
2 years	Undresses with help
3 years	Dresses with help
5 years	Dresses and undresses without help

Drawing

Age	milestone attained (mnemonic : LOX -STD)
2 years	Draws line → Horizontal line : 18m - 2y → Vertical line : 2-2.5y
3 years	Draws circle(O)
4 years	Draws cross/plus(x)
4.5 years	Draws square (□)
5 years	Draws triangle (Δ)
6-7 years	Draws diamond/rhomboid (◊)

Language and social milestones

00:24:26

Language milestones

Age	Language milestone attained
3 months	Cooing (musical) sound
4 months	Laughs aloud
6 months	monosyllables(ma, pa)
9 months	Bi-syllables (mama, papa)
1 year	1-2 meaningful words
15 months	Jargon speech (meaningless words ;temporary milestone for 1-2 months)
18 months	8-10 meaningful words
2 years	100 words, speaks in sentences
3 years	Recognizes and tells name, age and gender.
4 years	Tells story and rhymes

Normal Development

49

Social milestone

----- Active space -----

Age	Social milestone attained
2 months	Social smile
3 months	mother regard
6 months	Stranger anxiety, smiles at mirror image
9 months	Waves bye-bye, plays "peek a boo"
1 year	Plays simple ball game
15 months	Points to objects
18 months	Domestic mimicry (imitates actions of adults)
2.5-3 years	Parallel play (Non-interactive)
4 years	Group play (Interactive play)
5 years	- Follows 3 step commands - Identifies 4 colors - Repeats 4 digits

Miscellaneous milestones

00:35:26

milestones

milestone attained	Description	Features	
Mouthing	Puts objects/hand in mouth.	Starts at 6 months	Seen till 18 months-2 years.
Casting	Deliberate throwing of objects	Starts at 12 months	
Object permanence	Feeling that a missing object is present though not seen in the field of vision	Around 9 months.	
Handedness	Preference of one hand over the other.	Starts by 3 years & firmly established at 4 years	
Hand regard	Plays with own hands	3 months - 5 years (>5 years → Developmental delay)	

Range of vision :

Age	Response
Newborn	Follows objects upto 45°.
1 month	Follows objects upto 90°.
3 months	Follows objects upto 180°.
4 months	Fully established Binocular vision

Localization of sound (Hearing) :

Age	Response
Newborn	Startles in response to sound.
4 months	Horizontal localization of sound.
6 months	Downward localization of sound.
7 months	Upward localization of sound.
10 months	Diagonal localization of sound

Indicated by turning head towards sound source.
Assessed using **murphy's sequence**.

Assessment of development

00:46:39

Pull to sit maneuver :

Newborn : Complete head lag
(no head control)

3 months : No head lag
(head control attained).

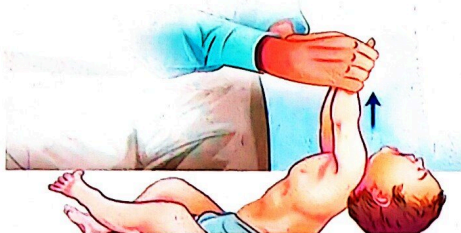

Ventral suspension :

Age	Response to ventral suspension
Newborn	Head and limbs drop down (no control).
2 months	Head <u>at level</u> with rest of body.
3 months	Head is lifted above the level of body

In prone position :

648c85cfee3b03a74e182fab

Age	In prone position
Newborn - 2 weeks	- Legs : Folded, kept beneath abdomen. - Pelvis : Lifted compared to rest of body.
4-6 weeks	- Legs : Straighten - Pelvis : In level with rest of body (baby lies <u>flat</u>).
3 months	- Head lifted up. - Elbow flexed/bent. - Bears weight on forearm.
6 months	- Head lifted up. - Elbow straight (in extension). - Bearing weight on extended limbs.

Newborn

3 months old

6 months old
